Graphic Designs

Social Media Creatives

One of my interests is graphic design. I enjoy projecting ideas and experiences and communicating with the audience through visual and textual content. I've been designing graphics since I was in elementary school. I primarily concentrate on designs that communicate with the audience. Minimal designs with large fonts and a good image to cover up the entire design. I make every effort to create visuals that convey the comfort and quality of the product.

Two screenshots of digital platforms. The left screenshot shows a landing page for a 'UI/UX Online Class' with a green background, featuring the 'Pocket studio' logo, a woman's profile, and text about expanding skills. The right screenshot shows the 'Bookoe' platform interface, displaying a 'BACK TO SCHOOL' offer, book recommendations, and various service icons.

Logo Designs

I've had the great luck to work with a number of businesses from their beginning. From the logo comes the beginning of the business and the visualization of a brand. I make an effort to create logos that accurately reflect the company's brand, whether it be business, playful, cozy, or bright. I make an effort to create simple, vibrant logos so that I can utilize the same hues and forms for branding and marketing in the future. Making social media posts will be simpler for me as a graphics designer once a logo has been decided upon and the customer is satisfied with it.

UI/UX Projects

Coding and development are my interests because I studied computer science in high school and college. I used to design the UI/UX for various projects and develop responsive websites in HTML, Bootstrap, and Angular JS. Although I no longer code, my UI/UX skills are improving on a daily basis.

The image displays two devices side-by-side. On the left, a smartphone shows a 'KALAM' app interface with sections for 'Analytics' (including metrics like 40.5% books sold, 10.5% response rate, and 40.5% feedback) and 'Earnings' (showing \$16,890.00 earned in March). A button at the bottom says 'Visit Kalam.com'. On the right, a laptop displays the 'AFFIXGlobal' website, featuring a dark header with the logo and navigation links for 'About', 'Job Support', and 'Contact us', along with a green 'Ask for a Quotation' button. The main content area has a dark background with a large white banner that reads 'GRAPHICS DESIGN SUPPORT'. Below this, there's a 'Filter' section with dropdown menus for 'Area of Expertise' and 'Skill Set' (listing Adobe Photoshop, Adobe Illustrator, Maya 3D Designing, Design Consultant, and Sketching), and a 'Available Experts' section showing a profile for Ketan Maharjan with an 'Hire for Project' button.

Case Study:

Tiffin Batta

Target and Challenge

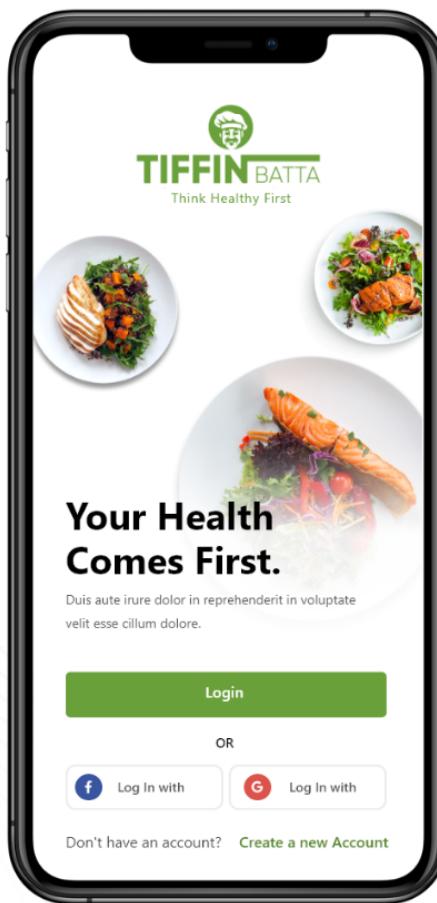

The company desired simple and minimal designs that could be used by people of all ages. They wanted to represent their brand while also highlighting healthy food at an affordable price. Tiffin Batta also preferred to popularise the concept of subscription-based food. Their primary market is office workers, health-conscious individuals, gym goers, and so on.

Solution

My ideas were initially based on their colors and brand. My aim was to keep customers interested in this app by the use of clear, straightforward, and informative content. By emphasizing nutritious eating as much as possible, I was able to complete this assignment in just 15 days.

About Company

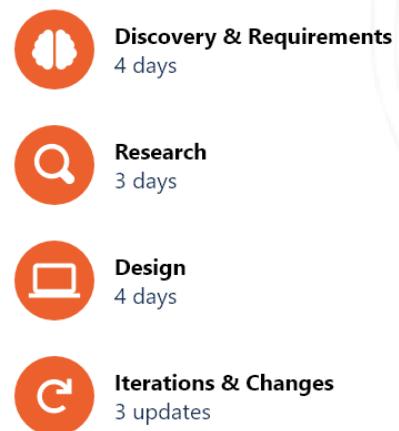

Tiffin Batta serves healthy dishes to people who are unable to prepare nutritious meals for themselves. They have a subscription model in which customers can create a diet based on their needs and place orders on a daily, weekly, or monthly basis.

Bhada Pay

Target and Challenge

As previously this type of platform was not available, a team from Nepal and a team from India thought it would be a good idea to develop this platform.

The main challenge was the popularize this type of platform and for the mass to use this, so the design needed to be simple yet informative.

The target audience of this platform are landlords with single or multiple properties, and tenants ranging from age 28 and above.

Full project UI/UX on request

Send a request email

About Company

Bhadapay is a website/app that serves as a channel of communication between a tenant and a landlord. A landlord can use this platform to update the details of his properties as well as how much he wants to charge to rent them out. Similarly, someone looking to rent out a property can search for available properties. They can communicate, negotiate, and then create a contract as a result. The next payment due will also be communicated to the landlord and tenant via notifications and SMS.

Solution

I started this website primarily concentrating on the Simple UI design and then went on to the application side of the website. From managing tenants to managing landlords, the admin view had complete control over the system and made sure that no data leaked. It was necessary for the transaction and conversation to take place on this platform.

The screenshot displays the BhadaPay software interface. On the left, a sidebar lists various administrative functions: Invoicing, Account Settings, Create Payment, Create New User, Active users, View activity log, View payment history, Manage Remittances, Manage EPC, Manage Standard, Manage Property, Manage Payment, Manage Payment History, Manage Report, Manage Communication, Manage Transaction Report, Manage Message, Manage Chat Box, Manage Notification, Manage Invoice / Receipt, Manage Agreement, Manage Bank Account, Manage Content, Manage Email Subscriber, Manage API, Application, and Others. The 'Account Settings' section is currently active, showing 'Account Settings - Users'. A modal window titled 'Add a new User' is open in the center, prompting for First Name, Last Name, Email, Phone Number, Location, and Status (with a toggle switch). Below the modal, there is a placeholder for a profile picture with the text 'Drop and drag image here or [Browse photo]'. At the bottom of the modal is a 'Submit' button. The background shows a list of existing users with columns for First Name, Last Name, Email, and Action (with edit and delete icons).

Affix Global

About Company

Affix Global provides immediate job support to anyone who needs assistance with specific tasks or projects. Affix was a platform where experts could sign up and update their skills as well as the fees they charge. When a customer requires a freelancer or job support, Affix provides a platform to connect the customer with the talent needed to solve the problem. This type of service is very popular in the European market, and an NRN wanted to create a platform that was similar to it.

Target and Challenge

The website had to be extremely clean, minimal, and user-friendly. This was the first phase of the website, and they intend to expand this platform and grow on Fiverr and Upwork work modules in the future.

Creating a talent rating system was a huge challenge for me. This was not included in the first phase because everything was done manually.

Solution

This website was created with the services they offered and the color of the brand in mind. I was in charge of the platform's research and design.

Smart Book

Target and Challenge

Smart Book wanted an app that was similar to the popular ebook apps on the market (Kobo, Kindle). They wanted to concentrate on simple and minimal designs that could be used by people of all ages.

Because their primary audience ranged from 10 to 50 years old, the design had to be simple and user-friendly.

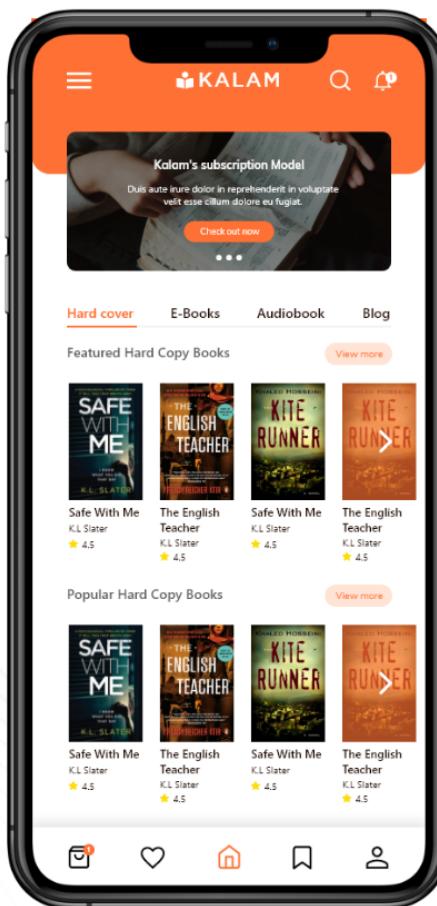

Solution

Because I took over this project from another designer, I had to redesign everything from the layout to the fonts.

I began my designs by focusing on their brand and colors. Customers were engaged on this app by using simple, clean, and informative text. I was able to complete this project in 12 days by showcasing their products (e-books, audiobooks, and hard covers) as much as possible.

About Company

Smart book was a platform that provided users with E-books, Hardcover Books, Audiobooks, and a blog. They collaborated with several book stores, authors, and publishers from across the country to fill the website with fantastic literature materials.

The screenshot shows the search interface of the KALAM app. At the top, there is a navigation bar with three horizontal lines on the left, a logo in the center containing a book icon and the word 'KALAM', and a red circular icon with a white checkmark on the right. Below the navigation bar is a large search input field with the placeholder text 'Eg. Umbrella Academy'. To the right of the input field is a black 'X' button. Underneath the search bar, the word 'Search' is displayed in a large, bold, dark blue font. Below 'Search', a subtitle in a smaller dark blue font reads 'Duis aute irure dolor in reprehenderit in voluptate velit esse cillum dolore eu fugiat.' A section titled 'Categories' follows, featuring a grid of six book covers with titles: 'Thriller / Crime / Suspense', 'Self Help', 'Biography', 'Science Fiction / Fantasy', 'Mystery / Thriller', and 'Romance'. An orange 'View more' button is located to the right of the first row of categories. Below the categories is a section titled 'Filter' in a dark blue font. Under 'Filter', there is a 'Book name' input field with a placeholder 'Search via book, author or publisher name' and a magnifying glass icon. There is also a 'Price' section with a slider set at 'Rs. 250'. The bottom part of the screen features a section titled 'Book Type (Enter Tags)' with a grid of five tags: 'Fiction', 'Young Adult', 'English', 'Nepali', 'Romance Novels', and '19th Century England'. At the very bottom is a large orange 'Filter' button.
